oct '55 - Jan '57

INDEX of STRETCH MEMOS.

1. —
2. Cycle requirements (Nov 55)
3. Ring accumulator.
4. Sequencing mem. references.
5. Input output, Sect I.
6. Basic accumulator logic.
7. Automation of Design.
8. —
9. Logical Functions for Selectors.
10. Multiply
11. Partial Word Data System.
12. Indexing
13. Input output. Sect II
14. Logical Equations for ANS Decoder.
15. A Method to Eleminate Some Problems by non-Sequential Refs to Memory
16. Editing - Part I
17. Editing - Part II ?
18. Selector System
19. Subprogram Techniques.
20. Significant Figures Required
21. —
22. Error detecting and correcting code.
23. High Performance Tape Specs.
24. Card reader for Stretch and 705.
25. 727 Tape Unit for Stretch

26. Logical Connectives
27. Method of checking.
28. (Several Memos from Mil. Products)
29. Stretch RAM, Initial Specs.
30. Multiple Precision Add & Subtr.
31. Suggested Memory Configurations
32. Buffering I/O
33. Tentative Specs. for Printed Document Reader.
34. Multiple Precision Multiply
35. Practical Multiple Precision, [illegible]
36. Multiple Precision Decide
37. Method of Rapidly advancing or decreasing a Binary No. by 1.
38. —
39. The STRETCH System, 6 papers
40. Memory Word Length. (60 vs 64)
41. A Note on Automatic Square Rooting
42. —
43. —
44. Word Length Choice & Grouping.
45. Memory Word Length and Indexing
46. Binary-decimal and decimal binary conversions
47. Unattended operation of Stretch-Planning Considerations.
48. A Procedure for the STRETCH automation of Design.
49. Timing Diagrams
50. —

1. Method of Decr. Mpy Time
2. Delayed store
3. Memory addressing
4. Temp. Storage
5. Mem. Addr. Decoder. Error Det.
6. Compl. Mult.
7. Error Det. & corr.
8. Logical Connectives.

1. an outline of project STRETCH
2. motivation for the computer
3. the LINK system
4. the LINK exchange
5. STRETCH components
6. automation of design

June 20, '56

51. Error Correcting Codes using compatible Families
52. Clearing of Memory.
53. Time clock.
54. Shape & Character Recognition
55. a Program for Maintenance development for Project STRETCH.
56. -
57. -
58. High Speed Arithmetic in a Parallel Device
59. Character Recognition
60. -
61. -
62. "Fingers or Fists?" decimal vs binary
63. Memory Bus File Memo #3
64.
65.
66.
67.
68.
69.
70.
71.
72.
73.
74.
75.
