TO: Mr. D. W. Holmes
Mr. H. G. Jones
Mr. M. P. Parker
Mr. D. W. Sweeney
Mr. R. A. Wadsten

SUBJECT: Computer Committee

This is to advise that a committee has been organized in White Plains, chairmanned by Mr. B. L. Hanahan, with the following objectives:

1. By May 1, arrive at specifications for a 7070 replacement, with emphasis on cleaner design.

2. Beyond May 1, to work on principles of machine organization, hopefully arriving at an optimum logic for both commercial and scientific problems.

The committee would presumably serve as a central source of advanced ideas.

The existence of this committee should in no way lessen our interest in advanced machine organization nor does it in any way release us from responsibility to determine the best machine organization for machines developed in Poughkeepsie. However, we should make effective use of the ideas originating in the committee where they are applicable.

Please advise all concerned of this development and please let me know if there are any questions.

D. W. Pendery
