To: 1959 Eastern Joint Computer Conference Authors

This will, I trust, be the final communication to the authors regarding the 1959 EJCC "Proceedings" and reprints therefrom. The last of the revised copy was received from the authors January 19th, typesetting was completed on the 29th, and the balance of the mechanicals are going to the printer today. Shipment of reprints should commence around February 15th, and mailing of bound copies of the "Proceeedings" should start about the 19th.

With the typesetting done, we have been able to finish paging the publication, and we can now tell how long each paper will run. This information will be of interest to those who have waited to order reprints until they found out how much was involved. This is the breakdown:

Prices for reprints remain the same. The author or authors of each paper may obtain 100 "press sheet" reprints (printed one side only) at a nominal cost of $10.00. The charge for normal reprints (printed both sides in booklet form) will be equivalent to $25.00 per page 1000 copies in increments of two pages. Thus a five-page paper, which will be reprinted

as a six-page booklet with one page blank, will be billed at the six-page rate.

If the "Discussion" section were omitted in the reprint, the following papers would run one page shorter and reprints would be $50.00 cheaper per thousand: Block; Lourie, Schrimpf, Reach, Kahn; Skranstad; Chao; and Campbell, Vollenweider. Dropping the "Discussion" section would shorten the Lewin and the Lukoff, Spandorfer, Lee papers by two pages.

If you would like to order reprints and have not yet done so or if you would like to change your order for reprints, please notify Harlan E. Anderson, EJCC Publications Chairman, c/o Digital Equipment Corporation, Maynard, Massachusetts, by February 8th.
