~~topics covered at one time or another during the meeting~~

Subject: Presentation made to [redacted] group from AEC (Lawrence Radiation Laboratory), Oct 20, 1960.

Personnel Present:

[redacted] LRL	IBM	
Dr. Sidney Fernbach	E. Adams - Res.	L. Robinson - DP
Mr. James Horton	G. Amdahl - Res	T. Cummins - DP
Mr. William MacNaughton	A. Leiner - Res	D. Loab - Res
Mr. Jerry Russell	H. Kolsky - FSD	
Mr. Kenneth Tiede	N. Rochester - Res	
	J. Cocke - Res.	
	W. Shenel - Res.	

The following topics were covered during the meeting: ~~[illegible]~~

I. Magnetic Components (W. Shenel)

To make magnetic memories bigger & faster there are four major areas which must be speeded up.

1. Transmission delays
2. circint delays -- decode & amplify
3. [redacted] emitting time of elements
4. drive current capability.
