Bill Halladay, Survey of Business now — Oct 13, 1960

Omega - (1) B-70 term last Nov. (B-52 repl) some engrs were farmed out 7070 - 30, Charleston - 50
cutback 723 people (2/3 of people)
Then prototype effort - 200+ people
now (tomorrow) back on full sched - less money - same sched

Cecil Johnson - very tough - good on getting work

(2) B-52 retrofit etc. - very lucrative $200M backlog (400 people)
ACR - radar - undermanned by 100-150 people.
(3) Titan - now in trouble - not undermanned
Tech probs + tech manpowering - (1) floating heads stick
(2) components failure
(3) swimmers don't work
big future in process control - oil companies etc. -

(4) ASW business -- "Artimes" - will go in future - when ??
small study contracts now

(5) Radiation effects studies for "Skybolo" ← look in "Red book"
"Dynasoar" - based on Titan
buildup - will overload next year,

Kingston: — less business planned. 1538 people (engrs.)
(1) SAGE - dropping off
320 now engaged in commercial
all busy till March,
→ trying to move some of Omega business to Kingston ---

Madison - Halladay's counterpt,
Cypser
Cooley - very good lab mgr.

(2) STRETCH - Harvest

- SAGE I
- product improvement
- SAGE II
  displays
  field data - looks rich
  L contracts
- misc. military
- commercial
- "Black Boxing" 43 people

talk to { Biel / Eugene Hall - Kingston
