Dept Meeting Nov 28

| | | |
|---|---|---|
| 75 | DSD | } to Labs |
| 135 | Kingston | |
| ~20 | Endicott → Owego | |

Titan soon --

Kennard - part time starting Thurs.

Benton - back tomorrow

manpower limits - Kingston - Owego

rumors

Re: Computed functions

$n$ bits in plugboard $\overset{?}{=}$ $n^2$ bits in memory   Table lookup.

a calculated one

check This statement

### Background-Theory

- solid state review
- Theor. physics review
- Rel. Theory review
- circuit Theory

### Background-Appl.

- Stretch manual
- Harvest manual, etc
- → write review of paper
- review competitive equip. notes
- review Computing magazines
- Sighting Reports
- other Engr. Reports

### Immediate

- Morf proposal
- [illegible]
- discuss current situation
- go over org. chart
- current engr reports.

Bill Teague

STR in new circuits ?      COMPAC

both will not happen ; STR is delayed / new machine } may be not either ;

DSD [illegible] and shape financially ,

[illegible] → FSD ?, not likely

Special machine contracts to FSD – not DSD ,

[illegible] has spent all of R&D money

A machine contract is what is needed .

Q Who have need for ~~the~~ one ?

" " capacity for "

" " data flow

" customers don't know how to use what they have

need for communications — money should be spent here .

What [illegible] phase out of [illegible] ?

[illegible] phase out — would be a problem .

multi processor — critical [illegible]

random
10 - 30 μs write
1 - 5 μs read

[illegible] GE thermoplastic

need millisec range
