Regarding Vela Sierra

Nov 9, '60

Bob Craigo, Hunt Curtis, HSK,

Gil Anthony – Map Matching – celestial navigation,
Scan Image orthicon – Videcon ?
only small % in visible lite

– looking at ~~[illegible]~~ Ionosphere absorption -- changes caused by x-Ray.
30 Mc – swings up & down in freq – quiet band,
monitor noise signal -- watch for changes in absorption
sun caused big variations – Every small Time variation
Error sensors are much slower –

– watching phase of low freq radio -- changes in level
– with a very narrow freq.

What about ns levels of sunspot variations?

A Unsolicited Proposal,
