FEB 27 1981

Some STRETCH Dates =

Sep 20, 1955 – first meeting - announcement at LASL

Jan 6, 1956 – LAFO letter - Request for proposals

Jan 24 - Feb, 1956 – Trip by selection team to 4 companies

Nov 17, 1956 – AEC Contract signed. (+ 42 months → May '60)

Sep 5, 1956 – First meeting of STRETCH Math. Planning group

Sept 19-20, 1957 9th meeting

Feb 4, 1959 –

Dec 1957 – "design complete"

~~[illegible]~~

Contract renegotiating – May 1959

EJCC ~~[illegible]~~ paper – Dec 1959

May 1961 – delivery to Los Alamos

March ~~[illegible]~~ 15 1966 – Dunnell made IBM Fellow

I come to Poughkeepsie	Aug 27, 1957
left for Omaha	aug 1959
came to San Jose	Jan 1961

21-22 Feb '61 Livermore meeting with SG Campbell

9-11 May '61 WJCC Los Angeles

July 1961 at LASL 1 – ~~[illegible]~~ 10 working

July 11-12 STRETCH USERS' group meeting ←

[June 20-22, 1971 STRETCH Party at LASL] ←

- Buchholz book - Published 1962 (Draft sept 1961))

Dates:

4 companies visited in Jan 1956
Written Proposals from 3 (Reeves Instr., IBM, Sperry Rand) 1 Mar 56 ←

- LOS alamos Field office Letter 1955
- Technical evaluation of Proposals apr 2, 1956 ← recommended IBM $4.3M

Technical advisory Committee -- 8 people + S F Black of LAAO

[N. Goldstein, HGK, RB Lazarus
N. Metropolis, EA Voorhees, D.F. Woods
B. Carlson - chairman]

0.5 μsec exclusive of accessTime, mpy + div could be between one & two μsec ea

Speed: Letter called for 0.625 – 2.88 μs/op ←tome range
IBM estimated 0.84 μs

longer word length, checking, data rate of disk (8× faster than expected) 1M words

delivery: Nov '59, if contract starts 1 May 56

HGK died Feb '56 } Instruction mix: 6 6 3 1
LD+ST Add Mpy Div

IBM 704 was computed to be 92.3 μs

Interlacing memories was mentioned –
– IBM's lead in transistors Technology and high speed cores – hey

---

"100 people by Sept 1" – 1956

Jan 26, '56 meeting: C Hurd, P. Whitaker, S Dunwell, J. Backus, R. Thomas, D. Pendry

---

June 11, 57 H. Mussolle S Dunwell, W. Wolensky, F Brooks, W. Buchholz, D. Sweeny, J-Cocke, J. Griffith G. Blaauw, E. Codd,

B Carlson R Lazarus, L. Wood, E Voorhees, HGK

"3 in 1 study" – LASL, Harvest, Comercial —

June 27, 28, 1957 — 7th meeting of Math. Planning Group

Sep 19, 20, 1957 — 9th

Dec 1957 — Last meeting ??

	Dates
STRETCH 7030	5/61
Mod 91	2/67
UNIVAC LARC	5/60
CDC 6800	6/67
Mod 75	11/65
Philco 2000 Mod 213	10/66
7094-II	4/64
CDC 6600	9/64
7094-I	9/62
7090	6/60
701	5/53
704	4/56

Sep 19, '56

60 bit word was suggested earlier
now 64 bit word was mentioned because of binary advantage
& ability to work with portions of words

Nov 14, 56 +15 at LASL

Floyd Johnston, Bill Strengfellow, Dennwell, Nate Edwards, L. Griffith, C. Hurd, R. Thomas, Bob Evans.

This was complete description of machine

"10 Megapulse"

60 bit word because divisible by 1 2 3 4 5 6 10 12 15 20 30

Sep 20, 1955 C. Hurd "announcement of new machine"

10 Mpulse

L. Hunter - core, (2 μsec)

S. Dennwell - organization (6 memories + fast 20 word Transistor mem.)

fast tapes
RAMAC disk - possible
I/O Echange

"Roughly 100 times 704 speed

[200× Fl multiply / 50× Fl add] ← note...

L. Griffith - application speed,

Ext. 39 mos to build - "last 12 mos are factory planning & setting up production."

Nov 9, 1956 meeting on Electronic Printer

Bob Evans

Sept 5, 1956 Was first meeting of Stretch Mathematical planning group.

B. Calson, H. Kolsky, R. Fazarus, D. Wood, R. Frank, E. Voorheer, L. Sarahan, J. Griffith, D. Sweeney, F. Beckman, F. Johnson, S. Dennwell, W. Buchholz, F. Brooks, J. Cocke, W. Wolensky, W. Strengfellow, W. Hunt, R. Seeber, J. Pomerene, P. Herwitz
