Machine room

1. Was ready for assembly at about 10 am — turned in cards, ↑
2. Assembly actually took place about 12 noon ↓ 3½ hrs
3. Got cards and listings about 1:30 pm
4. Turned in program 1:33 pm for debugging trial
5. Got call about 2:10 pm to come to machine room for trial
6. Argument about not having tape output box, etc on card,
7. Needed one deck reg Tr card, or different loads — no chance given to get these and continue run — problem ordered off machine, without permission — tape lost, etc.
8. Had to go back + rewire program with grid in key punch room about 2½
9. Waited around machine room about 15 min — no indication from operators of when prob was to be run.
10. Checked back twice during next ¾ hour still no indication as to when run would take place.
11. Returned to office 3:30 pm
