W. Bureau
Bu. of Stds.

Wh. Pl. { Arnie Kleinbecker (has Kenny's old job.)
Smith Homans Mkt for govt.

Sol Gass gave talk to Appl. Sci. in Wash – second hand info, only

stress { ⇒ avoid indexing (patents)
⇒ any individual op. is meaningless – timing

W. Bureau: Kressman – Num. W. Pred.
Smagorinski – Air flow – world wide

Example:
all branching = Testing where a point is – height – over land +

→ We would like a sample problem from W. Bu.

{ What size machine do they need – – – extreme packing now required.
worried about cost of disk.

Memorandum to: Mr. V. A. Tauber

Subject: STRETCH

Following up on our meeting this week regarding STRETCH computer requirements, arrangements have been made for Dr. Harwood Kolsky, who is associated with our STRETCH Program, to be in Washington on the 16th and 17th of June.

It is suggested that Dr. Kolsky spend the 16th in further detailed discussions, following up Dura Sweeney's discussions, with appropriate members of your office to further orientate you with STRETCH. Dr. Kolsky advises that he has an appointment on June 17th with your representatives and the Bureau of Ships. He does not know, as of this writing, whether it is A. M. or P. M. Should this appointment last for only half a day, Dr. Kolsky would like to spend some time with Dr. Smagorinsky of the Weather Bureau to further explore the possibilities of simulating on STRETCH techniques a Weather Bureau program.

By copy of this letter to Don Pendrie, Dr. Kolsky and Arnie Kleinsbecker, I am advising them of these final arrangements.

I will be in Washington these two days, and should Arnie Kleinsbecker decide to come, you will hear from him direct.

Transportation and hotel arrangements, if required by interested individuals, should be made direct with your office.

If, for any reason, the above arrangements are not in accordance with your desires, please advise.
