Meeting in White Plains Sept 22, 1958

J.J. Kenny Jr. Kleinbecker ?
C. DeCarlo Sheehan ?
Ware Homans

1 1/4 of '61 or better delivery

1 of 1st 2 systems commercial, promised

[2 planned for '60 besides L.A. & Harvest.
[10 61
8 '62
20

'60 = 2	2 = '60
'61 = 10	10 = '61
'62 = 18	18 = '62
'63 = 10	20 = '63
40	10 = 64
	60

assume reg rentals – question of 4 year rental.

[$247 K for Los Alamos config.
$10M purchase]

what to Westinghouse & GE & Reston Bond } 2 Stretches + 709TX

package?

~ $9M purchase

Interpolate linearly between 20 + 40 for 30 price

1. proposal
2. Forecast Mkt
3. Price accepted.
   Purchase
   Rentals.
4. Delivery 1961
5. Programming – Outline only the minimum assembly, monitoring.
   present level FORTRAN
   (Same as Los Alamos program)
6. I/O

Final Price Nov

Kolsky } White } Tech. proposal in Poughkeepsie:

4 men: Wash, Pittsburgh, Schenectady,

approx. no. men on each acct

Meyer 1 Wash Fed - NRB
Waldorf 1 Pitts
Hazard 1 Schen.
1 Control
1 Sew

punch 250 cpm

prints.

reader.

{ H. K. Wed am. / ~~24~~.
{ Don Pardeljo,

Tech proposal:

Spec: by Fri ~~night~~ afternoon 9/25 When, how ~~it~~ will help. } ←

Write: Technical selling proposal.

They ask for what they want. — but must be reasonable.

9/26 DeCarlo PM
Finance
Segal

9/29 Palmer AM
Becker
Simmons

9/29 MB Smith PM

in proposal 1959 Dec 1 709TX ((no commitment on 2nd))
When: 1961 1st quarter — check with Dunwell ←

be specific about what might be delivered later.

be tangible on everything.

Any future I/O eq. will be compatible.

→ I be here Fri again.

stress compatibility

on 709 we will take care of their requirements on end of 59
These then hold until 1/4 '61, Stretch 2 if they need them.

Mcco.

Tech Proposal: — but generally — programing assistance

— (Find out if Appl Sci. Reps. really know customer's problem)

(→ Total) 2 or 3 sheets on 6 sheets

Sheldon ask { Basic Exchange - is it included in main frame? 8 channels only? not
{ Tape control ~~unit~~ - " " " → don't have cost ests now. Rough as well est. for per & reads. not in next 2 weeks

Geo. Mico

- main questions - reliability

byte conversion within months

right ballpark.

{ S. Homans - Wash. Fed.
{ Joe Sheehan - 3 regions
whole country covered.

{ 57 at $100.K
{ 30 at $200.K

Format of Proposal (BMEWS)

Cover letter.

- we sincerely believe the equip we now have to offer you will best satisfy your interim requirements & will be available within your required time schedule

1. Res. & Technology must be at the highest level
2. Design must provide reliability, ease of maint, & flexibility
3. Programming must exist.
4. Educational facilities must be available for training personnel in maint. & operation of equipment.

Selling $3,355,000. new transistorized computer units plus certain std. equipment

Receipt of order by Sept 2, delivery in Feb 1960.

Appendix to letter.

Transistorized Units $ 3,355,000.

1. 1 Mag Core Mem. Unit (32K)
2. 1 Central Processing Unit
3. 1 Multiplexor Unit
4. 1 Tape + Card Data I/O channel
5. 1 Tape I/O Channel
6. 5 Type 729 I -TX Tape Drives ($27,500 ea)

Standard Prices of IBM 200 Series Units:

1. 1 Type 711 Cd Reader	2,000
2. 1 Type 716 Cd Printer	54,200.
3. 1 Type 721 Cd Punch	25,000.
4. 4 Type 729 III Tape drives ($59K ea)	236,000.
	$ 3,339,700.

F.O.B. IBM Plant

(supplemental to letter) Advantages of The IBM 709-TX } on separate title page

Programming Advantages

a major undertaking must be handled rapidly, efficiently, correctly. Translation of The math formulation requires a large staff -- prog. checkout & availability of computer,

Major Areas: (1) level of experience (state of art) is higher
(2) Already trained on 704 at Westinghouse
(3) SCAT system already developed
(4) Compatible - 704 progs can run. as well as 709
Westinghouse has spent many man years

General Advantages

Programmer Training:

IBM has an educational facility for field training of programmers at no cost. — many programmers have already been trained under this prog.

Maintenance:

Staff of qualified customer Engrs. on your premises

Special Engg. Prod. Div.

available to design & manufacture non-standard equip. as required.

Complete package Delivery:

diagnostic progs

Maintenance Advantages

A. accessibility
  1. Rollagon pull-out drawers
  2, minimum no. of component circs. . pluggable cards

B. Preventive Maintenance.
  1. marginal checking.
  2. diag. routines
  3,

Reliability

A. Components.

NPN, PNP, Drivers

B. circuitry

C. Experience

on 608 41.6 million hours — defective transistor repl. rate .005% per 1000 hrs.

forecast .001%

Machine Features

A. Speed

709+X 5MC, 2.4 μs storage

B. Flexible Command Structure

C. Tape Drive Features

D. Prog. Features

Fixed pt. & logical	(16 instrs)
Wd. Transmission	(15 instrs)
Shifting oprs.	(7 instrs)
Control Instrs	(65 instrs)
Index. Transmission	(14 instrs)
Fl Point	(13 instrs)
I/O commands	(35 instrs)
Sense Indicator ops	(24 instrs)
Logical (Boolean)	(10 instrs)
Convert (table lookup)	(3 instrs)

E. Wordsize

F. Systems Features

Cd Rdr, Pr., Punch may be attached to any chan.

Standard peripheral may be used

modular construction. - can expand later.

G. Summary

(5 Times speed, small cost increase. (improved job cost)
(programs already available

(reliability, Reduction in floor space & air cond.

(maint, educ., prog. res., systems consultation.

BMEWS

very similar

Includes Electronic clocks $45,750.
