WORLD HEADQUARTERS POUGHKEEPSIE

Memo to: Mr. B. O. Evans December 16, 1955

Subject: AEC Formal Proposal Ref: Your memo of December 12, 1955

I have reviewed with the other members of the STRETCH group the preparation of a formal proposal of the "Livermore" type. We believe that this can be done by January 1, 1956 as requested if all members of the group are free to devote their full time to it.

One technical question which we are not able to settle in Poughkeepsie is the amount to be said about the RAM. This will be taken up immediately with Mr. R. B. Johnson at San Jose.

We intend to prepare the proposal on Ozalid to permit changes to be made more easily than was true of our "Livermore" effort. The paper will be personalized with a monogram of some sort. We would like to adopt a name for the Los Alamos copy of the machine and include it in the monogram. If you or anyone else has any ideas as to a name, we would appreciate them very much.
