SMFI - 3

I-BOX 3 PROGRAM

JB AX 3

April 5, 1961

1. Programs becoming obsolete: None

2. Used to provide a test of the Central Processor I-Box.

TABLE OF CONTENTS

		Page
1.	Purpose	1
2.	Program Introduction	1
3.	Operating Procedure	1
4.	Program Philosophy	2

1. PURPOSE

The I-Box 3 Program provides the maintenance engineer with a test for the proper loading and storing of the index registers.

2. PROGRAM INTRODUCTION

2.1. This program has been designed for use after the I-Box 1 and I-Box 2 Programs have been run successfully.

2.2. The program operates under the control of the Sense Switch Interrogation Program (SSIP).

3. OPERATING PROCEDURES

3.1. The Sense Switch Interrogation

Program must be in the machine.

3.2. Loading Procedures (PUNFUL Cards)

3.2.1. At the Maintenance Console:

1) Depress Master Reset

2) Depress Start Clock

3) Depress IPL

4) Disable Interrupt and Time Clock

5) Enable Maintenance Mode

3.2.2. Place binary deck in card reader.

3.2.3. Depress Start on card reader, the program will start itself.

3.3. Error Indications

The program operates under Sense Switch Interrogation Program (SSIP) control, all error indication options of the SSIP Program apply to this program. Refer to the SSIP Program write-up.

3.4. Success Indications

All success indication options of the SSIP Program apply to this program. Refer to the SSIP Program write-up.

3.5. Operation Options

Refer to the SSIP Program write-up for all operation options.

4. PROGRAM PHILOSOPHY

This program is designed to test I-Box instructions and associated hardware. The entire program is under SSIP control. Below are listed all of the routines that are a part of this program and a brief description of what each tests:

XCS Tests Index Core Storage for reading and writing of ones, zeros, and one-zero patterns.

1222 Checks SV and SVA to all three memories and checks SVA to all classes of instructions (Internal, External, and Index Memories)

1224 Checks SC to all three memories.

1226 Checks LV from all three memories, LVI, and LVNI.

1228 Checks LC from all three memories and LCI.

1230 Checks LR from all three memories and LRI.

7030 DPS
